

HANGZHOU RAINBOW AUTO PARTS CO., LTD

A company focuses on producing high quality auto filters, including [air filters](#), [oil filters](#), [fuel filters](#), filter elements, [cabin filters](#) and fuel water separator, spark plug.

- [An oil filter](#) is a filter designed to remove contaminants from engine oil, transmission oil, lubricating oil, or hydraulic oil. Oil filters are used in many different types of hydraulic machinery. A chief use of the oil filter is in internal-combustion engines in on- and off-road motor vehicles, light aircraft, and various naval vessels. Other vehicle hydraulic systems, such as those in automatic transmissions and power steering, are often equipped with an oil filter. Gas turbine engines, such as those on jet aircraft, also require the use of oil filters. Aside from these uses, oil production, transport, and recycling facilities also employ filters in the manufacturing process.
- A device for removing particulate impurities from the air. When the piston machinery (internal combustion engine, reciprocating compressor, etc.) works, if the impurities such as dust are inhaled into the air, it will aggravate the wear of the parts, so [the air filter](#) must be installed. The air filter is composed of a filter core and a shell. The main requirements of air filters are high filtration efficiency, low flow resistance, long continuous use without maintenance.
- The function of [fuel filter](#) is to filter out harmful impurities and

moisture in fuel system, protect the normal operation of engine, reduce wear and tear, avoid blockage and improve engine life.
